

HIGH- PERFORMANCE PROTECTION FOR FIRST RESPONDERS

Honeywell Multi-Response Gear

Honeywell

HONEYWELL MULTI-RESPONSE GEAR

Turnout gear (TOG) provides layers of protection to keep firefighters safe when responding to a structural fire event, but when nearly 90% of your calls are not structural, you need the next generation of technical gear.¹

Many departments are using their high-investment TOG or their stationwear on these emergency medical or search and rescue calls because there is no alternative at their station.

Honeywell Multi-Response Gear was developed to provide firefighters and emergency medical technicians (EMTs) with certified gear that is comfortable and less bulky than TOG, yet maintains quality protection during non-fire calls. Lighter-weight gear means you expend less energy, which lowers your risk of overexertion. Whatever your needs, Honeywell Multi-Response Gear can be configured to your requirements.

FIRE SERVICE CALL STATISTICS

- Nearly 90% of fire department calls in 2016 were medical, aid, or rescue.¹
- Structural fires have decreased 6% since 2008.²
- The average amount of acreage burned in a wildfire has increased 9X since 1985.³

3. "Total Wildfire Acres, U.S. 1985-2018 (except Alaska)," (As cited in Gabbert Wildfire Today, 2019) National Interagency Fire Center, <https://wildfiretoday.com/tag/statistics/>

FEATURES AND BENEFITS

Lightweight

Reduced weight as compared to TOG makes work easier and less stressful on your body.

Mobility

Engineered to create ease of movement with design features such as a bi-swing back and a contoured waistband.

Durable

Fabric and construction work together to deliver quality, rugged gear that holds up to all the hazards you face.

Economical

Invest in a lower-priced garment that won't put wear and tear on your premium TOG.

PRODUCT SPECIFICATIONS

NFPA Certifications Available:

1951 Urban Search and Rescue and 1977 Wildland

Additional Certifications coming soon to support a wider variety of calls and incidents.

DEFENDER M® 650

Offers the best combination of ruggedness, value, and innovation for Multi-Response Gear.
