Object: Request for regulatory related information

Dear Customer,

HONEYWELL supports the general objectives of all global environmental government regulations which seek to ensure a high level of protection of human health and the environment from the risks that can be posed by chemicals, the promotion of alternative test methods, enhancing competitiveness and innovation.

According to California EPA's Office of Environmental Health Hazard Assessment (OEHHA):

The California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) requires the State to publish a list of chemicals known to cause cancer or birth defects or other reproductive harm. This list contains a wide range of naturally occurring and synthetic chemicals that are known to cause cancer or birth defects or other reproductive harm, additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents, chemicals used in manufacturing and construction, and byproducts of chemical processes, such as motor vehicle exhaust.

Businesses that are subject to Proposition 65 must provide a "clear and reasonable" warning before knowingly and intentionally exposing anyone to a listed chemical. This warning can be given by a variety of means, such as by labeling a consumer product.

As part of our ongoing compliance commitment, we have processes to identify which if any, of the products we supply to you require a warning label. Please refer to the spreadsheet accompanying this letter **ES_California_Prop_65_Annex_1_2_3.xls**.

As a result of those processes, we hereby confirm that, to the best of our knowledge, the products listed in the **Annex 1** and that we currently supply to you do not require product labelling in accordance with Section 25249.6 of the Act.

Products listed in **Annex 2** are marked with the new style warning labels.

This communication refers to the latest version of the regulations at the time the product was shipped.

Best regards

Donald E. Douthit, Director Regulatory Compliance
