

THE GAS DETECTION YOU TRUST. THE FLEXIBILITY YOU NEED.

Honeywell Gas Detection Rental Program – United States & Canada

Honeywell

TEMPORARY SHOULDN'T MEAN COMPROMISING ON QUALITY OR RELIABILITY.

Select from multiple gas detection kits designed to meet your needs.

Your team shouldn't have to settle for unfamiliar gas detection and training to support them during high-stress and high-demand rental periods. Now, with the Honeywell Rental Program, they can rely on trusted equipment, enabled by Honeywell Gas Detection.

BENEFITS OF RENTING A HONEYWELL GAS DETECTION PRODUCT

- Our most popular gas detectors are available to rent as kits or individual units
- Rental devices are offered through Honeywell authorized distributors to ensure availability during periods of high demand
- A smart, simple, and economical option for part-time needs
- Intuitive, user-friendly operation requires less time for setup and training
- Supporting accessories like batteries and sensors are also available to rent

KITS

Convenient, ready-to-go kits include everything your team needs, including portable gas detectors as well as supporting devices, such as docking stations, enablers, and gas regulators.

INDIVIDUAL UNITS

Ideal for protecting workers on the go, in confined spaces and during spot leak testing, Honeywell portable gas detectors are recognized for their quality and reliability. A variety of single and multi-gas detectors are offered in compact, lightweight designs — from fixed-life, single gas units to advanced, fully configurable and serviceable instruments.

ACCESSORIES AND ADD-ONS

Supporting accessories such as docking stations, batteries and sensors ensure your team has everything they need on site.
